Section:

IRIS HINGED

- Mounted on the outside of doors or windows and opens outwards or inwards in the form of a wing.
- Modular and practical.
- Long lasting.
- It can be easily detached from its hinges and cleaned by washing.
- Inward openings prevent risky and dangerous situations caused by push and hit.
- Suitable for pet owners with tear-proof mesh option.

IRIS SLIDING

- Mainly used on sliding doors and windows.
- It runs horizontally on a rail mounted on the upper and lower parts of the door or window joinery frame.
- Useful and effective results in all sliding joinery made of aluminum or PVC.
- Suitable for pet owners with tear-proof mesh option.
- Available from single to six-leaf systems and more if needed.

IRIS FIXED

- Simple and efficient insect screen systems for windows.
- Easy to operate.
- Economic and durable.
- Mounting without drilling. No damage to the window.
- Suitable for pet owners with tear-proof mesh option.
